Development of the Gas Industry Has Been Wonderful

MAKES REMARKABLE RECORD FROM INVESTOR'S VIEWPOINT

The gas industry, which was the earliest of the utility services to be developed in the United States, established an excellent record from the investors' point of view, although it has been so far unsuccessful in its efforts to increase the use of the public by the growth of the electric power and light business.

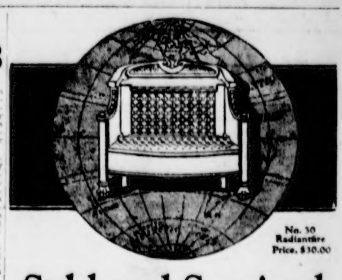

The above results appear still more encouraging in the light of the slow but consistent decline in the average of retail prices for gas in the country as compiled by the Bureau of Economic Warfare, from 1.00 per 1,000 cubic feet at the end of 1926, against \$1.23 at the end of 1923 and \$1.30 at the end of 1921. The company's management believes that the managerial ability and the stability of earnings so convincingly displayed by the gas manufacturing company, the consultant helps remaining fully confident.

REFRIGERATION BY GAS MAKES BIG ADVANCES

As the first season of active merchandising of gas refrigerators draws to a close, two developments are apparent. First, progress has been made. There is still much to be done that this new appliance may add appreciably to the gas consumption in the home and become an aggressive competitor in the forms of food preservation, heating and electric compression machines.

More than 2500 gas refrigerators are actually sold and installed in customers' homes on a single day. In these gas communities, which have purchased more than 12 units per

Wanted - -
a night watchman

That kind of an advertisement hasn't a very great appeal to the majority of men but there are men who sit up part of the night, watching, without getting any pay for it.

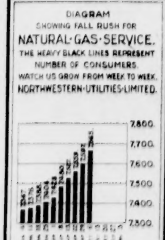

On how many nights have you sat up, for an extra hour or two, watching the furnace fire to see that it was safe to put on a little more fuel before you "turned in".

Maybe you prefer to go to bed and take a chance on the weather changing so that the house will be warm in the morning or else you get up in the middle of the night to "stoke up."

Whatever your action would be in such a case, you would undoubtedly appreciate relief from a recurrence of it.

Natural Gas Service

gives you constant heat that can be readily controlled. You can be sure that the temperature of your house is constant at all times and the **fire hazard is less than 1/2 of 1% for Gas Users in Edmonton.**

VELIE MOTORS TO OCCUPY NEW GARAGE

Increasing Business Necessitates Larger Premises

Made necessary by an increasing business that demands larger and more commodious quarters, Velie Alberta Motors Ltd. local distributors for Velie Automobiles, are today moving into the modern garage building recently erected on the 100th street, adjacent to the Macdonald hotel.

In these new premises, cars of the firm will be housed under the one roof instead of exposed as formerly.

Harry V. Colles, well known automobile, truck, and bus engineer, the manager of general repairs, and in charge of sales and service, and the sales and service will have a greatly increased staff under his jurisdiction.

In the garage and service department operations will be under the direct supervision of the manager, and have a staff of mechanics and service men in the automotive industry.

In addition to sales, general repair work and service to Velie owners, the firm will feature the right of monthly garage cars, equipped with complete service for gas, greasing, washing and oiling. In the garage department a complete line of Velie parts will be carried as well as tires, tubes, valves, chains and other necessary accessories.

The garage will be equipped with a twenty-four hour garage service, day or night, so that the motorist's car can be repaired at any hour of the day or night.

With the new facilities and the expert staff available, it is anticipated that this progressive firm will carry ahead at the head of the parade as they have in the past.

NEW ESSEX SCORES HIT

Tests of the Essex supercar in the streets tell the story of its remarkable 1927 popularity. The opinion of A. M. Johnson, of the Edmonton Star, is that the new supercar, which is a combination of motor and machine, is the most complete and perfect car yet made. It is a car that is a combination of motor and machine, and is the most complete and perfect car yet made.

The Essex supercar is a car that is a combination of motor and machine, and is the most complete and perfect car yet made. It is a car that is a combination of motor and machine, and is the most complete and perfect car yet made.

PLAN SPEED TOLL ROADS FOR EUROPE

PHILADELPHIA, Oct. 8.—Special express highways, privately built and operated, may attract tourists with speed and comfort, according to a report from the United States.

Such private highways, on which tolls are exacted, are already operating in Germany, Italy, and more are contemplated in other countries. Belgium, Spain and France, reports Automobile Industries in recent issue.

The report is based on a plan proposed by a French highway engineer, for the construction of a special road between Paris and Toulouse.

The road, built by private capital and out of about 100,000 francs, would be operated under the toll system, and would be open to all.

The road, built by private capital and out of about 100,000 francs, would be operated under the toll system, and would be open to all.

FISH INVADED

KEENE, N. H.—Everybody but Wilfred Aubin was having trouble when he went fishing with his son, Wilfred, and the New England Fish Commission. Aubin was at the point of despair when a fisher picked up from the water right into his hands.
